PARENT/GUARDIAN INFORMATION AND RESPONSIBILITIES DIABETES MANAGEMENT PROTOCOL

A collaborative effort of the Halton Catholic District School Board, the Halton District School Board, Halton Regional Health Department and the Trillium Paediatric Diabetes Health Care Centre has developed a Diabetes Management Protocol along with resources for school sites to manage and accommodate students diagnosed with diabetes (Type 1 and Type 2).

The Diabetes Management Protocol, Parent/Guardian Information Package and Type 1 Diabetes video is accessible to parents on the HCDSB website:
www.hcdsb.org + PARENTS + Safe, Healthy and Inclusive Schools + Medical Conditions + Diabetes

THE STUDENT DIAGNOSED WITH DIABETES AND THE SECONDARY SCHOOL ENVIRONMENT:

When students enter high school they are expected to assume a more independent role in the management of their diabetes. The high school environment is much harder to control than the elementary school setting where movement was minimal and the interaction was with a limited number of teachers. At high school students move around the entire campus and interact with many teachers and peers. The school still plays a supportive role in assisting your child's independent management of his/her diabetes and responding to emergency situations e.g. low blood sugar. It is important to be realistic about what can be controlled by the school and school staff. Parents are encouraged to meet with school administrators to develop in consultation a student individual plan to outline student responsibilities for their diabetes management and the support the school can provide to keep your child safe. (Student Management Plan – Secondary Schools page- 9)

RESPONSIBILITIES OF PARENTS/GUARDIANS:

- Inform the school of your child's diabetes - Type 1 or Type 2.
- TYPE 1 - Forms to be completed for your child (located in this package). Submit the forms to the school administrator before your child's first day of school (last week of August).
 - Request and Consent for the Administration of Type 1 Diabetes Interventions
 - Hypoglycemia – Emergency Action Plan
 - Student Individual Plan
- TYPE 2 - Forms to be completed for your child (depending on the type of management of their type 2 diabetes by the child's physician request the appropriate forms from your school administrator):
 - Request and Consent for the Administration of Diabetes Intervention Type 2
 - Student Management Plan Type 2 (Secondary Schools)
 - When directed by doctor to check blood sugar:
 - Type 2 Hyperglycemia Emergency Action Plan
 - When directed by doctor to take insulin:
 - Hypoglycemia Emergency Action Plan

It is important that the above forms be completed and returned to the school prior to the student's attendance at school. Without access to the information on the forms school staff have limited information on the child's medical condition which affects how the school staff can appropriately manage the diabetes and treat for emergencies.

- Meet with the school administration and appropriate school staff and provide information related to your child's diabetic condition.
- If school intervention is needed for your child to manage their diabetes, by school staff, (e.g. during blood sugar checking, insulin taking) communicate your request to school administrator.
- Should parent/guardian feel that their child requires professional health services within the school setting to assist with management protocols:

Procedures:

A meeting is to be arranged with parent/principal and discussion to take place.

- The principal and parent will complete an application form to the Community Care Access Centre. (Principal will have application form)
- The principal will send the completed application form to the CCAC
- A CCAC Case Manager will contact parent and principal and complete an assessment of the child's health care needs in the school setting.
- A multidisciplinary conference may be required to identify the needs at school and to determine eligibility for CCAC services.
- On admission, goals will be determined and a service plan developed to ensure the safest possible learning environment for your child.

On occasion, there may be a waiting period for some services, and/or a lack of availability of service providers. In these circumstances, the CCAC will work with parents and school staff to develop a safe plan for the child.

- Parents are responsible to keep school up to date with changes to contact information, medication or medical condition diagnosis as soon as reasonably possible.

Procedures:

Changes to contact information e.g. contact person and/or contact number:

- Provide school administrator/designate in writing the name(s) of person along with contact number.

Changes to medication:

- Provide school administrator/designate the completed HCDSB Request and Consent for the Administration of Prescribed Medication. Form can be accessed through school administrator.

Changes to medical diagnosis:

- Provide school administrator/designate a completed copy of the HCDSB Change of Medical Diagnosis Form. Form can be accessed through school administrator.
Note: Changes to your child's diagnosis must be accompanied by a note/letter from your child's physician indicating the change.

- Where appropriate provide and maintain a supply of fast-acting sugar at the school.
- Blood glucose monitoring items and insulin injection items and medication should be in a clearly labelled container (student's name, address).

Location of the student's blood sugar testing kit and fast acting sugar: Students are to have ready access to their blood sugar testing kit and fast acting sugar at all times.

- Students are to carry their blood sugar testing kit and fast acting sugar at all times (e.g. to and from school, when moving classroom locations, breaks, all field trips, evacuation procedures and lockdowns.)

OR

- Where (age, pupil capacity (intellectual/physical), activity or location) prevents safe carrying the blood sugar testing kit and fast acting sugar must be located in proximity to the student for ready access.

Parents are to:

- Inform, check and review when necessary with their child the location of their blood sugar testing kit, insulin injection apparatus and fast acting sugar during the school day and at school sponsored activities.

Inform your teen about their responsibilities outlined in the following Student with Diabetes Responsibility Checklist

STUDENT WITH DIABETES, RESPONSIBILITY CHECKLIST:

- If student has Medic Alert information to be carried/worn to do so at all times.
- Recognize your symptoms of a low blood sugar and high blood sugar and how to take appropriate action to treat the symptoms
- Student is to carry their blood sugar testing kit, fast acting sugar and insulin injection at all times during the school day or at board/school sponsored events OR is always accessible to their location.
- Take proper care of your blood glucose monitoring and insulin injection apparatus, including proper disposal.
- Know how to administer the blood glucose monitoring system, insulin injection, safe disposal of lancets and needles, how to manage and use appropriately the insulin pump (e.g. administering a bolus dose).
- Take responsibility in providing the self-administration of low blood sugar treatment.
- Promptly inform a responsible adult (e.g. teacher, coach) that you have diabetes as soon as symptoms appear or when experiencing a general feeling of 'un-wellness'.
- Report immediately any and all teasing, bullying and threats you receive to an adult in authority.
- Never isolate yourself, go off to a washroom by yourself, when checking blood sugar, administering your insulin or feeling unwell. Always inform someone of your location.

RESPONSIBILITIES OF SCHOOLS UNDER THE DIABETES MANAGEMENT PROTOCOL:

- A process is in place where students with Diabetes are identified to administrator(s) and school staff.
- Every student with diabetes (type 1 or type 2) should have a Student Individual Plan developed in consultation with the student's parents to determine the best support the school can provide to keep the student safe.
- Implement the Board's Diabetes Management protocol
 - When appropriate to convene a meeting with parents, school staff (e.g. teacher, coach) to provide information on the child's needs and accommodations and develop a plan for the student.
 - Provide in service training to school staff to prepare those who access the child on a regular basis to respond effectively to low blood sugar - hypoglycaemia incidents and other emergency situations.
 - Process in place to identify student(s) with diabetes to all those who come in direct contact with the student (e.g. on call teachers, Occasional teachers.)

FOOD: LUNCH BREAK:

The following will be communicated to school staff:

Food is like medicine to the student with diabetes. Eating is a key part of managing diabetes.

Responsibility Of School Staff

- *Allow student(s) to eat when they need to.*
- *Encourage student(s) to eat all the food as outlined in their prescribed diet and/or as prepared by their parents.*
- *Provide sufficient time for the child to eat all of the food (meal/snack). Supervising teacher to consider adjusting time requirements for eating.*
- *When appropriate teacher/coach to communicate to student/parent regarding special days that involve extra activity, so student can prepare for extra snacks or make insulin changes to reduce the chance of a low blood sugar.*
- *When appropriate communicate to the student/parent when there will be changes to the daily routine (e.g. extra help, detention, sport activity) where student may need an extra snack.*
- *Teacher and others are not to provide food as an incentive or reward to students.*

Lunch Time Supervisors

When supervising where there is/are student(s) with type 1-type 2 diabetes the following strategies are to be in place:

- School has a process in place to identify the student(s) with type 1 – type 2 diabetes to the Lunch Time Supervisor.
- School administrator is to check that the Lunch Time Supervisor has been trained in recognizing the symptoms of a low blood sugar and knows the procedures in managing a low blood sugar reaction and/or emergency response procedures.
- The following has been reviewed with the student with type 1- type 2 diabetes ahead of time:
 - To have their monitoring kit with them, at all times.
 - Recognize signs of low blood sugar
 - Inform Lunch Time Supervisor when they feel unwell/experiencing low blood sugar
 - Encourage student(s) to eat all the food as outlined in their prescribed diet and/or as prepared by their parents.

Extenuating circumstances, e.g. newly diagnosed student, may require further accommodations with supervision.

BLOOD GLUCOSE MONITORING/INSULIN INJECTION

- A suitable location in the school (e.g. quiet area in the classroom) to be provided for students to perform self-blood-glucose monitoring and insulin injections throughout the day.
- Supervision by staff provided commensurate with the student's abilities, as requested by parents, when student is checking blood sugar levels and insulin injection.

IMPORTANT NOTE:

School Administration and/or school staff, at school site or on field trips, do NOT:

- Administer insulin syringe injections.
- Administer glucagon syringe injections
- Push the release button on the insulin pump (e.g. manually provide a bolus dose (a burst of insulin) prior to the student eating.)
- Store insulin overnight.
- Determine procedures for low blood glucose count.

FAST ACTING SUGAR:

- A secure, accessible and appropriate place to store emergency fast acting sugar supplies (oral glucose, orange juice etc.) will be provided at the school site.
- Opportunities provided for fast acting sources of sugar to be taken by students at all times during school day and during all school sanctioned activities.
- Procedures will be in place to communicate to parents when new supplies of fast acting sugar are required.

NOTE:

School Administration and/or school staff do NOT

- Provide a supply of fast acting sugar (e.g. oral glucose, orange juice).

EMERGENCY PROCEDURES:

- The emergency treatment protocol as outlined on the Type 1 Diabetes- Hypoglycemia Emergency Treatment Form is to be followed.

SCHOOL STAFF ARE NOT HEALTH PROFESSIONALS:

Understand that school staff are not health professionals and have no more information about the medical condition of your child other than that which has been provided to them in writing by yourself or by the child's doctor. They are not experts in recognizing the symptoms of your child's medical condition or in treatment.

HALTON CATHOLIC DISTRICT SCHOOL BOARD

REQUEST AND CONSENT FOR THE ADMINISTRATION OF DIABETES INTERVENTIONS

DATE (yy/mm/dd): _____

This form is completed when the school agrees with the parental request to administer diabetes interventions. A new form is required: a) at the initiation of this process; b) at the beginning of each school year; c) when interventions changes. Staff agreeing to administer diabetes interventions will do so according to the information on the Diabetes – Student Management Plan and this form only.

A. To be completed by the parent/guardian (please print)

STUDENT NAME:			ADDRESS/ POSTAL CODE:		
Date of Birth (dd/mm/yy)		Gender: M <input type="checkbox"/> F <input type="checkbox"/>	Student #:	Medic Alert I.D.? Y <input type="checkbox"/> N <input type="checkbox"/>	
Grade:	Room:	Teacher:			
Name of Father:		Home Tel.#	Bus. Tel. #	Cell Tel. #	
Name of Mother:		Home Tel.#	Bus. Tel. #	Cell Tel. #	
Name of Guardian:		Home Tel.#	Bus. Tel. #	Cell Tel. #	
Emergency Contact:		Home Tel.#	Bus. Tel. #	Cell Tel. #	

B. To be completed by the parent/guardian (please sign at the bottom)

C. To be completed by a parent/guardian
(For diabetes interventions to be taken during school hours or school-sponsored events.)

Statement of Understanding

Regarding Parent Requests to Provide Diabetes Intervention to Students by Employees of the Halton Catholic District School Board

As the parent(s)/guardian of (print name of student) _____, I (we) accept and endorse the following terms and/or conditions pertaining to my (our) request for Halton Catholic District School Board employees to provide, under our own authority, my (our) child with interventions listed on the Diabetes – Student Management Plan. Specifically, I/we understand and accept that:

1. Board employees are not trained health professionals and, hence, may not recognize the symptoms of my (our) child's medical condition or know how to treat the medical condition;
2. Board employees do not: administer insulin syringe injections; push the release button on the insulin pump (bolus); store insulin overnight; determine procedures for low blood glucose count; supply fast-acting sugar; administer glucagon syringe injections; dispose of sharps.
3. I/we are responsible for supplying and maintaining a limited but adequate supply of fast acting sugar (e.g. juice boxes);
4. I/we are responsible for supplying our child/s/the student's blood sugar testing items and insulin injection supplies, and I/we agree that such supplies are to be in a safe container, labeled with our child's name for transport and storage in class.
5. I/we are responsible for providing up to date information to the school regarding changes in the medical condition, as well as changes that may affect the treatment as outlined in the Diabetes–Student Management Plan.
6. I/we release the Halton Catholic District School Board, its employees and agents from any and all liability for loss, damage or injury, howsoever caused to my/our child's person, or property, or to me/us as a consequence, arising from administering the interventions, failing to administer the interventions correctly and/or failing to administer any intervention.

Signature of Parent /Guardian: _____ Date: _____

Additional instructions as needed:

DIABETES INTERVENTIONS	Dose	PROVIDE @ (TIME)	REASON
1.			
2.			
3.			
4.			

D. To be completed by the parent/guardian:

Request and Consent for the Administration of Diabetes Interventions

Insofar as it concerns my child _____,

School: _____, I/We:

- I. Have read and understand the information conveyed in this "Request and Consent for the Administration of Diabetes Intervention" form;
- II. Agree to comply with the responsibilities described in Part B above;
- III. Request that the interventions listed in Part C of this form be administered to my/our child according to the information we have provided; and furthermore,
- IV. Release the Halton Catholic District School Board, its employees and agents from any and all liability for loss, damage or injury, howsoever caused to my/our child's person, or property, or to me/us as a consequence, arising from administering the interventions, failing to correctly administer the interventions and/or failing to administer any intervention listed in Part C above.

Signature of Parent/Guardian: _____

Date: _____

HYPOGLYCAEMIA EMERGENCY ACTION PLAN - (LOW BLOOD SUGAR)

Name of Student _____
Last Name First Name

STUDENT PICTURE HERE

Classroom Teacher _____

Wears a medic alert bracelet Y / N

Parent / Emergency Contacts: (Prioritize Calls – 1-2-3)

1. Parent _____ (H) _____ (W) _____ (cell) _____
Last Name First Name
2. Parent _____ (H) _____ (W) _____ (cell) _____
Last Name First Name
3. Other _____ Relationship _____ Contact Number _____
Last Name First Name

SIGNS AND SYMPTOMS OF A LOW BLOOD SUGAR ARE:

(Individualize for student)

Sweating Trembling Dizziness Mood changes
Hunger Headaches Blurred Vision Extreme tiredness / paleness
Other, please specify _____

If the student exhibits any of the above symptoms or feels unwell, looks unwell or says they are "low"

DO NOT leave the student alone

DO NOT allow the student to use stairs

ACTION

Ask student to check their blood sugar

If the reading is below 4.0 on the meter

Give fast acting sugar immediately:

3 glucose tablets or 6oz (175 ml) of juice / pop (not diet)

5 - 6 lifesavers or _____

If unable to check blood sugar - provide fast acting sugar (see above)

Wait 15 minutes - Repeat blood sugar check

If blood sugar is still below 4.0 repeat above ACTION and call parent

If blood sugar is above 4.0 and next meal/snack is greater than 1 hour away, follow-up with a snack (provided by parent), otherwise no further action required

WHEN TO CALL 911

If student is...

Unresponsive, Unconscious, Having a Seizure

1. Roll student on their side
2. Call 9-1-1
3. Inform EMS student has Type 1 diabetes
4. **Notify parents'**

If student is...

Unwell / Vomiting

1. Notify parents
2. Call 9-1-1 (if unable to contact parents)
3. Inform EMS student has Type1 diabetes

DO NOT give food or drink

I agree that the school may post my child's picture, take emergency measures and share this information as necessary, with the staff of the school and healthcare providers

Parent's signature _____ Date _____

This information is collected pursuant to s. 170 and s.265(1)i) of the *Education Act*, R.S.O. 1990, c. E-2 and s.28(2), 29, 30, 31, 32 and 33 of the *Municipal Freedom of Information and Protection of Privacy Act*, R.S.O. 1990, c. M-56 and the *Personal Health Information Protection Act*, 2004, S.O. 2004, c.3, Sch. A.

If you have any questions regarding your child's personal information please contact the Principal of your child's school

HYPERGLYCAEMIA EMERGENCY ACTION PLAN - (HIGH BLOOD SUGAR)

Name of Student _____
Last Name First Name

STUDENT PICTURE HERE

Classroom Teacher _____

Wears a medic alert bracelet Y / N

Parent / Emergency Contacts: (Prioritize Calls – 1-2-3)

1. Parent _____ (H) _____ (W) _____ (cell) _____
Last Name, First Name
2. Parent _____ (H) _____ (W) _____ (cell) _____
Last Name, First Name
3. Other _____ Relationship _____ Contact Number _____
Last Name, First Name

SIGNS AND SYMPTOMS OF A HIGH BLOOD SUGAR ARE:

(Individualize for student)

Extreme thirst Dry Mouth Frequent urge to urinate Tiredness/weakness
Difficulty concentrating Blurry vision Mood swings
Other, please specify _____

If the student exhibits any of the above symptoms

Ask student to check their blood sugar

If blood glucose is greater than _____ notify parent

If unable to check blood sugar remain with student and call parent

ACTION

Provide extra water

Allow student to have open bathroom privileges

Encourage student to exercise for 20 - 30 minutes if able.

WHEN TO CALL 911

Symptoms of Hyperglycaemia Emergency:

Extreme thirst; nausea and vomiting; severe abdominal pain; heavy breathing or shortness of breath; chest pain; increasing sleepiness or lethargy

Treatment:

Call 911

I agree that the school may post my child's picture, take emergency measures and share this information as necessary, with the staff of the school and healthcare providers

Parent's signature _____ Date _____
